

# Why

# Change?

## Who Should Consider an MH Software Solution?

- Your company is using a manual system as a low cost way of doing business.
- You are a fast growing dealership and need a system that can grow with you.
- You're using old DOS software or "in house" spreadsheets.
- You have realized that your salesmen would become more productive and your business more profitable by using industry specific software.

## Maybe It's Time To Change

Many retailers stay with their current way of doing things even if they know its unproductive because its comfortable. But comfortable doesn't always cut it - especially when it comes to the financial and long term success of your business.

## HOME/TRACK Delivers!

We designed the industry leading software package with two things in mind: Ease of use and Manufactured Housing. HOME/TRACK has been making retailers just like you more profitable for over 10 years.
