

WHITE PAPER FOR PRACTICE MANAGEMENT RECORDS

MicroMD™ PMR streamlines your clinic's workflow for greater productivity, improved patient care and increased profitability. Physicians recover valuable time and quickly gain advantages in the entire clinical process, by easily reviewing and documenting patient charts and ordering labs and tests. MicroMD™ PMR has proven to be a robust and reliable practice management solution that streamlines and automates core medical practice operations—including patient accounts, appointment scheduling, insurance billing, and managerial and financial reporting. The systems automated workflow means no more printed schedules, charge slips or pink phone message slips. Tedious payment posting is handled automatically. Your billing is complete and accurate, your data kept private and secure.

Flexible Visit Documentation

MicroMD™ PMR lets you choose your preferred path for documenting clinical visits using methods such as dictation, textual, pre-formatted forms or templates. MicroMD™ PMR lets you chart using Electronic forms that are built just like those you use now. Coding can be completed, prepped and sent to billing at the end of the encounter.

Improved Cash Flow

MicroMD™ PMR lets you quickly access and document a patient's clinical information, improving productivity of your staff while reducing costly paper processes and overall costs. MicroMD™ PMR can help reduce or eliminate the costs associated with conventional transcription and managing medical records within your practice. You'll also increase revenue through improved accuracy in clinical documentation, resulting in fewer denials and less time following up on costly insurance claims.

Enhanced Workflow Efficiency

MicroMD™ PMR provides you with the instant access to historical clinical patient data, including vital signs, lab results, allergies and medications. This information can be displayed graphically with the click of a mouse showing a longitudinal view of the patient record..

Enhanced Patient Safety

To enhance patient safety and quality of care, MicroMD™ PMR provides drug interaction alerts. Physicians and nurses can also easily view patient allergy summaries, problem lists and medications.
